

HI FLOW STROLLER®

Liquid Oxygen Portables

A safer way to breathe

Developed for oxygen patient transport when ambulation is needed, CAIRE's Hi Flow Stroller is truly state-of-the-art cryogenics. This intrahospital system was designed to complement the existing hospital ambulatory oxygen source.

The Hi Flow Stroller is considerably easier to use and, in turn, recognized as safer for both the patient and hospital staff. As a practical, money-saving solution, the effectiveness and simplicity of the Hi Flow is the answer to portable oxygen needs.

A perfect choice for hospitals and patients requiring higher flow rates, the Hi Flow Stroller is also a natural fit for those patients who need a portable oxygen unit that can keep up with them. The higher oxygen flow capacity makes the Hi Flow Stroller a natural fit for activities like hiking and fishing.

Features

- Ultra-lightweight: 8.5 lbs. (3,86 kg)
- 1.25 L capacity
- 20 psi operating pressure
- Available in comfortable black or grey soft case
- LED meter easy to read
- Side Fill and Top Fill configurations
- Increased ease of mobility
